PROJECT

Oct 2022

Portfolio Website (JavaScript, React JS)
· Created a personal website using React JS
· Deployed website on github.io using Node JS package manager

Jan 2022 – Mar 2022

TERA SQL Interface Project (SQL)
· Built a user interactive interface with tableau based on the client's requested requirements and features
· Preformed data cleaning on the database to eliminate incomplete data in the database
· Created multiple views for the data set containing only the data is of interest
· Weekly communication with the client on the status of our project, and updated the project accordingly based on the client's feedback
Write extensive documentation and instructions for the tableau interface and data cleaning procedures

Sep 2021 – Dec 2021

Wastagram (Flutter, Dart)
· Built an interactive mobile app, where the user can make a post similar to an Instagram post, using Google's Flutter SDK and Dart language
· Stored user generated post data created by the app to MySQL database and Firebase backend services

EXPERIENCE

Sep 2020 – Aug 2021
